# Vehicle Excise Duty and Company Car Taxation

## Vehicle Excise Duty

The amount of Vehicle Excise Duty (VED) payable on new cars varies depending on the level of carbon dioxide (CO<sub>2</sub>) emissions produced by the vehicle. CO<sub>2</sub> emissions are measured in grammes (g) per kilometre (km) travelled and divided into charging bands for each fuel type as shown in the table opposite.

## Automatic Transmission

Due to the change in CO<sub>2</sub> emissions with the fitment of automatic transmission, the VED may also change. As such, it will be possible to calculate the on-the-road price as follows;

## Example

**9-5 Vector SE 2.0TiD (160PS), Saloon (CO<sub>2</sub> emissions – 125g/km, Band D)**
