PREPARATION FOR MAP UPDATE

IMPORTANT: The map update DVDs included in this package can only be used for your particular navigation system. Do not use these discs to update any other navigation system.

Pictures shown in the package may appear slightly different than what you see on the navigation system. Please follow the step-by-step instructions in this manual to update your map data.

CAUTIONS: Do not manually eject the DVD before the map update is finished. If you eject the disc prior to completion, you may need to restart the map data update from the 1st step.

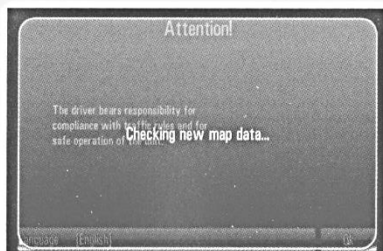

NOTES: A map update key is needed to update the map data. Please refer to the documentation sent with this map DVD package.

During the update, you cannot use functions such as HDD Audio, USB/i-Pod Audio, Navigation, Timishift of AM/FM, and Voice Recognition.

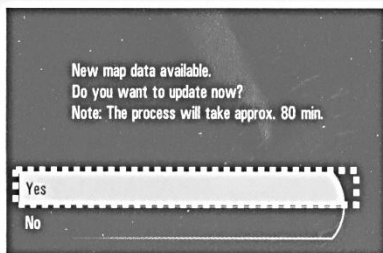

If the engine is turned off during the update process, the update will resume from the last position once the vehicle is turned back on.

UPDATING MAP DATA

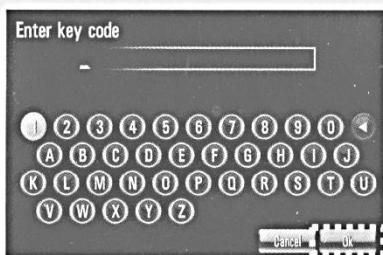

1. Turn the vehicle engine ON.
2. Wait until the opening animation is complete.
3. Insert Disc 1 in the disc slot. The "Checking new map data" message will display.

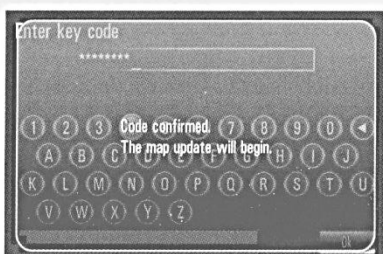

4. After about 30 secs to 3 mins, you will be asked if you want to start the map update. Select "YES" button on the screen.

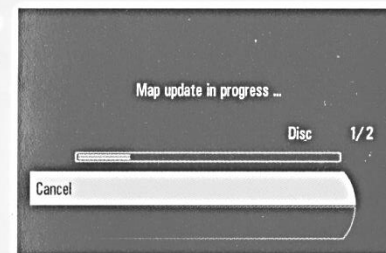

5. Enter the map update key and select "OK" button on the screen.

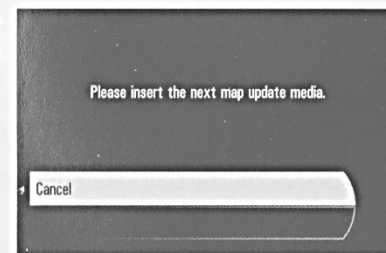

6. The "Starting Update" screen will display.

7. The display will transition to a screen showing disc 1 update in progress. The update will take about 80 mins.

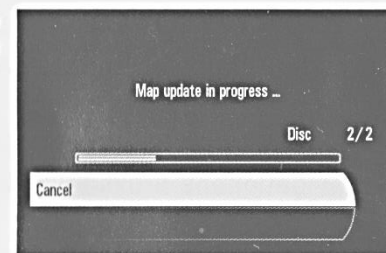

8. After Disc 1 update completes, the disc will automatically eject. Please remove it quickly.

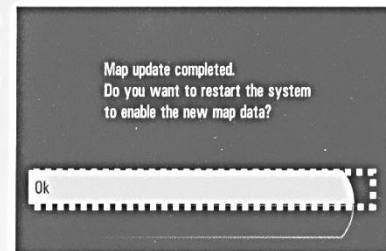

9. Insert Disc 2 in the disc slot.

10. After about 30 secs to 3 mins, the display will change to show disc 2 update is in progress.

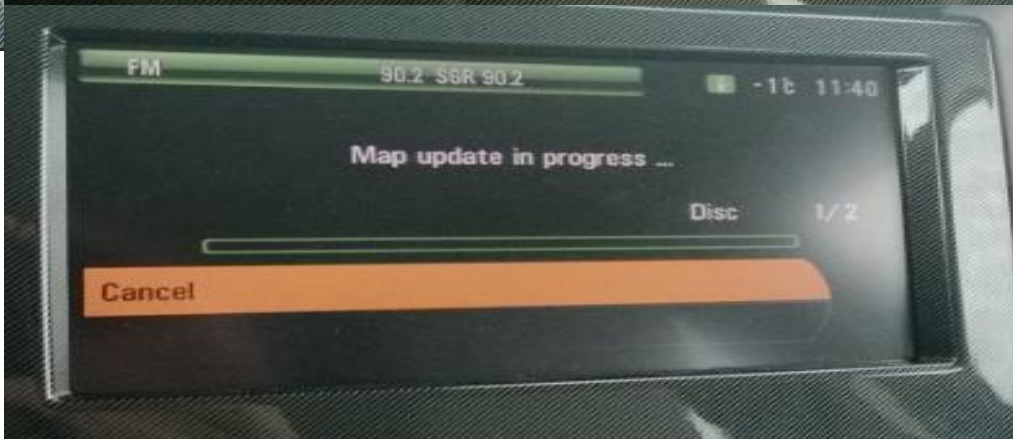

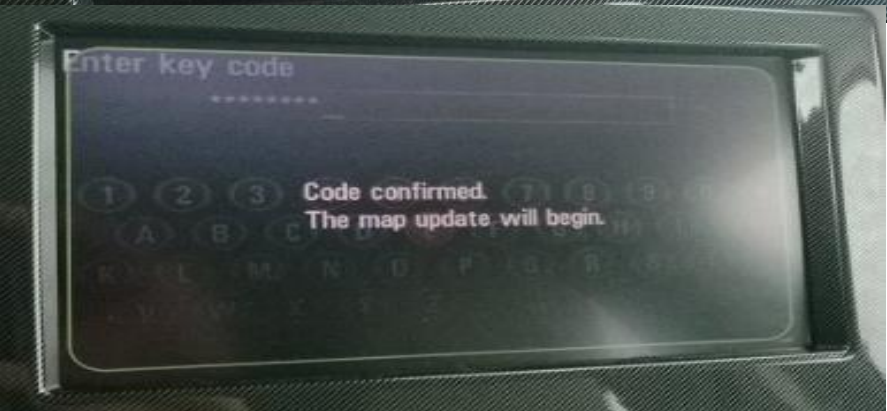

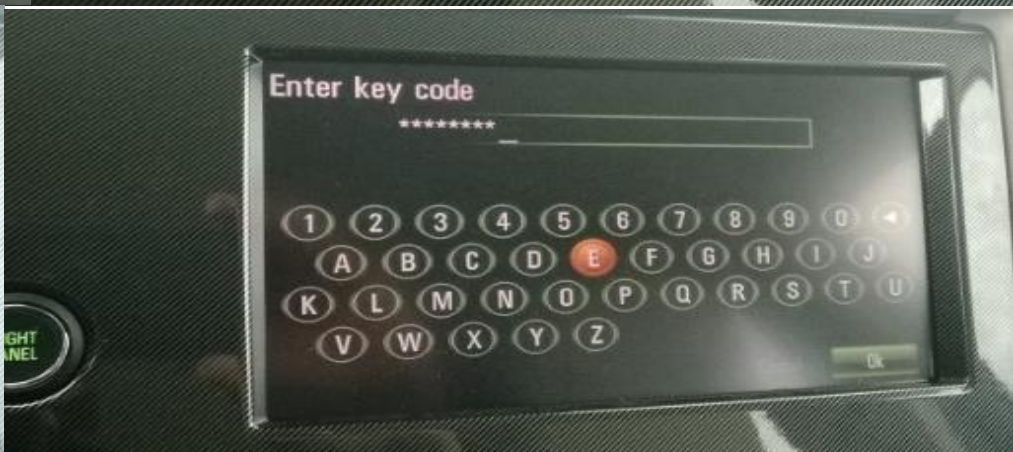

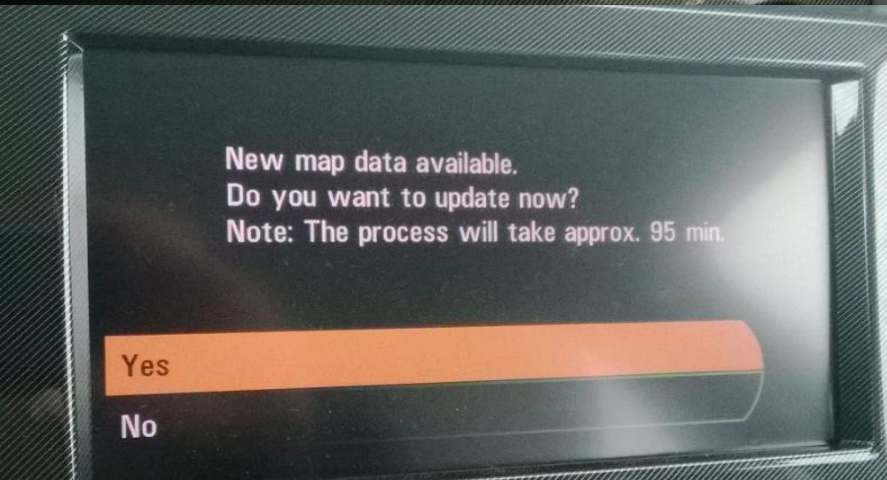

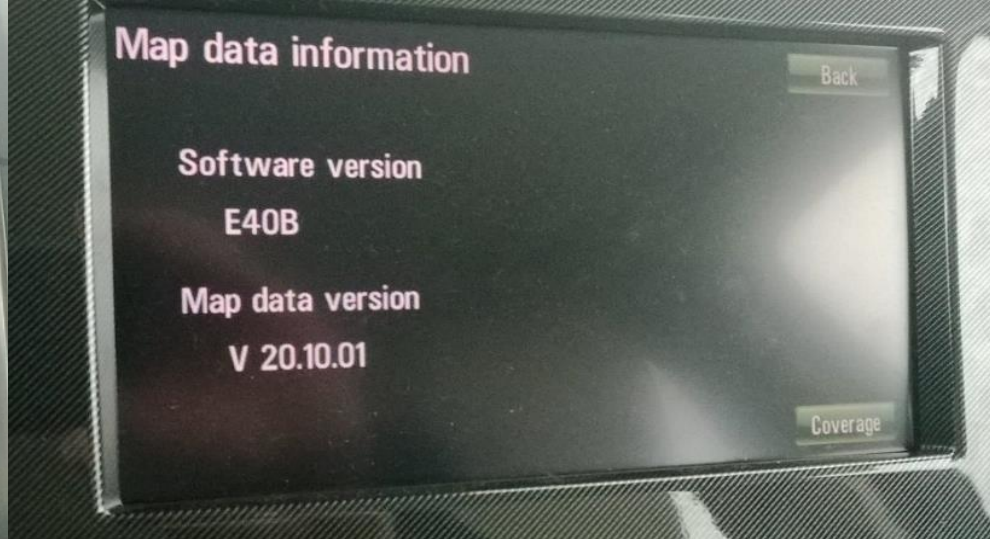

11. After Disc 2 update completes, the disc will automatically eject. Please remove it quickly.

12. The map update complete screen will display. Select "OK" button to reboot the system and enable the new map data.

13. Confirm that the opening animation is displayed.
